SUMMARY OF TEACHING – LEARNING METHOD:

The type of teaching-learning pedagogies employed by the faculty reveal to us that although a majority of the teachers use the traditional lecture method or the interactive lecture method, the faculty have been creative and considerate enough to understand the diverse needs and background of the students. Based on the outcome of the given course the faculty have supplemented the traditional method with a number of active and progressive student centred methods i.e. Problem solving, student Presentation, out- door experiments, experiential learning and case studies.

SUMMARY OF TEACHING – LEARNING METHOD:

The type of teaching-learning pedagogies employed by the faculty reveal to us that although a majority of the teachers use the traditional lecture method or the interactive lecture method, the faculty have been creative and considerate enough to understand the diverse needs and background of the students. Based on the outcome of the given course the faculty have supplemented the traditional method with a number of active and progressive student centred methods i.e. Problem solving, student Presentation, out- door experiments, experiential learning and case studies.
